LiveFeedEvents HTTP API

LiveFeedEvents it is technical events registered at Channex which can represent different things:

- Booking Events
  - New booking
  - Booking modification
  - Booking cancellation
- New message
- Airbnb events
  - new alteration request
  - new inquiry
  - new reservation request
  - new system notification
- Errors
  - Sync errors
  - Booking Rate Mapping error
  - Booking Room Mapping error

To work with LiveFeedEvents we expose API which support List and Show operations. Also, we have some specific API for operations associated with Airbnb.

List LiveFeedEvents

`GET api/v1/live_feed`

Response:

```
{
  "data": [
    {
      "attributes": {
        "event": "booking_cancellation",
        "id": "37461661-1b51-422a-9929-8d151c97c3c1",
        "inserted_at": "2023-06-09T12:08:33.222030",
        "organization_id": null,
        "payload": {
          "amount": "0.00",
          "arrival_date": "2023-09-07",
          "booking_id": "29ecf780-1495-4762-8a77-e4d8786bd6e2",
          "booking_revision_id": "050882e8-7b07-483d-9efd-bf8882758220",

    "total": 1
  }
}
```

As regular Channex List endpoints, this endpoint support Pagination and Filters.
You are able to filter LiveFeedEvents by `property_id` and `event`.

List of event types:

```
booking_new
booking_modification
booking_cancellation
sync_error
reservation_request
booking_unmapped_room
booking_unmapped_rate
booking_without_property_id
new_booking_after_modification
wubook_flooding_detected
sync_warning
message
general_error
alteration_request
inquiry
airbnb_notification
```

Get LiveFeedEvent by ID

`GET api/v1/live_feed/:id`

Response:

```
{
  "data": {
      "attributes": {
        "event": "booking_cancellation",
        "id": "37461661-1b51-422a-9929-8d151c97c3c1",
        "inserted_at": "2023-06-09T12:08:33.222030",
        "organization_id": null,
        "payload": {
          "amount": "0.00",
          "arrival_date": "2023-09-07",
