```

Field description

channel_rate_plan_id

Valid UUIDv4 represented associated Channel Rate Plan (Mapping to Listing).

listing_currency

Valid currency code for current Listing (3 symbols). Please, keep in mind, list of supported Currencies is limited by Airbnb side.

guests_included

Count of guests included into default price

default_daily_price

Positive integer value which represent default Daily price for Listing.
Please, keep in mind, prices from Channex.io will override this default price at Airbnb calendar.

weekend_price

Positive integer value which represent default price for weekend dates.
Please, keep in mind, prices from Channex - White Label Channel Manager API for PMS systems will override this default price at Airbnb calendar.

price_per_extra_person

Non-negative integer value. Represent amount which should be added to Reservation daily price for each additional guest over `guests_included` limit.

monthly_price_factor

Integer value between 0 and 100. Represent discount in percents which will be applied for long-stay reservations (longer then 28 days).

weekly_price_factor

Integer value between 0 and 100. Represent discount in percents which will be applied for mid-stay reservations (longer then 7 days).

standard_fees

List of object which represent applied fees.
List of supported fees:

- PASS_THROUGH_RESORT_FEE
- PASS_THROUGH_MANAGEMENT_FEE
- PASS_THROUGH_COMMUNITY_FEE
- PASS_THROUGH_LINEN_FEE
- PASS_THROUGH_PET_FEE
- PASS_THROUGH_CLEANING_FEE
- PASS_THROUGH_SHORT_TERM_CLEANING_FEE

Each fee should be provided as an Object with next structure:

```
{
  "amount": 10,
  "amount_type": "flat",
  "charge_type": "PER_GROUP",
  "charge_period": "PER_BOOKING",
  "fee_type": "PASS_THROUGH_SHORT_TERM_CLEANING_FEE"
}
```

amount

Non-negative integer value.

In case when `amount_type` is `percent`, value should be between 0 and 100.

amount_type

Enumerable. Accept `flat` or `percent` values.

`percent` value applicable only for `fee_type`: `PASS_THROUGH_COMMUNITY_FEE`, `PASS_THROUGH_MANAGEMENT_FEE`, `PASS_THROUGH_RESORT_FEE`.

charge_type

Whether the fee applies per person, per guest, or per pet. Default value is `PER_GROUP`.

A value of `PER_PET` is available exclusively for `PASS_THROUGH_PET_FEE`.

A value of `PER_PERSON` is available exclusively for `PASS_THROUGH_LINEN_FEE`, `PASS_THROUGH_COMMUNITY_FEE`, `PASS_THROUGH_MANAGEMENT_FEE`, `PASS_THROUGH_RESORT_FEE` when `flat` amount type is used.

charge_period

Enumerable. Accept `PER_BOOKING` and `PER_NIGHT` values.

The time period for which the fee will be charged.

`PER_NIGHT` option applicable only for `PASS_THROUGH_COMMUNITY_FEE`, `PASS_THROUGH_MANAGEMENT_FEE`, `PASS_THROUGH_RESORT_FEE`, `PASS_THROUGH_PET_FEE`.

Additional notes

`amount` for `PASS_THROUGH_SHORT_TERM_CLEANING_FEE` can't be greater than `amount` for `PASS_THROUGH_CLEANING_FEE`.

Response

Success result

Response will contain object similar to arguments under `data` key. Status code will be `200`.

Validation error

Response can contain validation error. In that case status code will be `422`.

```
{
    "errors": {
        "code": "validation_error",
        "title": "Validation Error",
        "details": {
            "pricing_setting": [
                "Short term cleaning fee must be lower than standard cleaning fee. Short term cleaning fee must be lower than standard cleaning fee."
            ]
        }
    }
}
```
